## Reading List for the Dogs of Chernobyl Webinar

Please see the following links for additional reading on the subject of the Chernobyl reactor accident and the life of the dogs.

An article currently under scientific review with publication TBA by Tim Mousseau who headed the research part of the project along with Elaine Ostrander of the National Institutes of Health. Participating libraries will be given links when they become available.

This is a very interesting article by a colleague and friend of mine, Jonny Turnbull who was on the campaign with me in Chernobyl. [Checkpoint Dogs. Photovoicing Canine Companionship in the Chernobyl Exclusion Zone](#) by Jonathan Turnbull. It talks about the relationship between many dogs and the guards who patrol the checkpoints into the Chernobyl Exclusion Zone.

### [Midnight in Chernobyl: The Untold Story of the World's Greatest Nuclear Disaster](#)

by Adam Higginbotham. A fairly recent and in my opinion definitive re-telling of the accident and the aftermath.

The [Dogs of Chernobyl Research Initiative](#). Tim Mousseau mentioned above is a part of this.

The [Clean Futures Fund](#) which organized the spay/neuter, research campaign.

[The Chernobyl Disaster: What Happened and the Long Term Impacts](#) by Erin Blakemore for National Geographic, with photos.

[The True Toll of the Chernobyl Disaster](#) by Richard Grey of the BBC. Very interesting, detailed look with great photos.
